

TITLE SHOULD BE CENTERED, BOLD, CAPITAL AND WITH A FONT SIZE 14

Author full name, Second author full name, Third author full name

1. ABSTRACT

Purpose: What the research aimed to investigate.

Design/Methodology/Approach: Data collection method including sampling with the number of respondents.

Results: Analytical methods and tests that were used.

Limitation of the investigation: Limitations.

Implications: Significance from the research.

Originality/Value: Novelty of the research.

Keywords: keyword, keyword, keyword, keyword

2. INTRODUCTION

This part should entail the definition of the problem statement and the background of the study.

3. LITERATURE REVIEW

This segment can have theoretical and empirical literature.

1. subtitle

4. METHODOLOGY

This part should consist of all information pertaining to the data collection method and the following include some of the sub-titles, which you may use. You also have the freedom to write the methodology with the sub-titles of your choice as well.

1. Conceptual framework with constructs and hypotheses (if you are testing hypotheses).
2. Research design process
3. Sampling design process
4. Instrument development process

5. RESULTS AND FINDINGS

Results and the interpretations are included.

6. CONCLUSION AND IMPLICATIONS

This part should include the significance of the research and how it provides benefits to society and to the world.

7. REFERENCES

APA 7th edition should be followed.
